

HISTORY OF UNIVERSE - VEDIC REVELATIONS

Part -2

According to Vedic Tradition, the human beings on this Earth were born 195,58,85,106 years ago ! Look at any Vedic calendars they all say this in the very beginning itself ! Lord Narayana created Bramha and Bramha started creation under the guidance of Lord Narayana. Bramha is a great architect of these species. He did this huge exercise of creating various objects of the universe and also the species according to the Vedic injunctions taught by Lord. Though Bramha too refused to start creation, for, he too seems to remain selfish for enjoying Bliss of the Divine abode of Lord Narayana yet, Lord Narayana convinces Bramha that he was created for that purpose and encourages him with all the support in every bit of his endeavour. Finally Bramha agrees to the divine ordinance.

Bramha started creation and great sages of first line were born. Then he created some Devathas, Manus and also their consorts in the same line. From his different organs came different people (prajapathis). From his shadow also some of them were born. At one time, He himself was divided into two parts one male and the other a female as its consort. He again took the new body and started to support the creation process. These Manus in turn, gave birth to thousands of human beings. Many of them are great sages and highly powerful class of humans. The whole class of Devathas viz., Adithyas, Rudras, Rakshasas, Kinneras, Kimpurushas, gandharvas, apsaras etc... were all subsequently born in different lineages of those sages. Every one is set in a specific role to care a part of administration of this Universe. They were all bound to the orders of Bramha who in turn is bound to the orders of Lord Narayana.

However, this creation process is a quite complex procedure with many many combinations, specifics and exceptions all in a wonderful orderly manner as per the guidelines of Vedas, carried out by Bramha. The whole Vedic mass is however not available to us. We know that out of 1131 branches only 11 branches were available today. These were being transferred down the lineages in a traditional manner for all these millions of years. Vedic sounds are pure sounds of this cosmos. When properly chanted and activated by all-pure human beings, these Vedic sounds themselves produce wonderful effects in this creation. What to say if their meanings are also rightly explored ? We today are losing the Vedic knowledge and also the traditional practitioners. Veda says that it will not remain with those who do not observe austerities as laid down for those who are supposed to practice them. It will curse those who try to meddle with them for selfish purposes. It also ordains to keep the traditional practice down the lineage pure and sacred. Any wrong interpretation or mischanting will lead to severe sufferings to the doers. Nature is never partial to any one. Also it never excuses any thing beyond limits. It cautions us in several ways and finally takes the course of action as per the injunctions of Vedas. Non-traditional usage of Vedas is proscribed by Vedas themselves and cautioned them of the dire consequences.

Vedas are divine sounds packed with countless knowledge and wisdom. Our Puranas, Ithihasas, Dharma Sasthras, Agamas etc. all have Vedas as their root. Creation of this Universe is wonderfully explained in Vedas and more detailed in Puranas and daily practices are elaborated in Sasthras and Agamas etc. History is recorded as-it-is in our scriptures that followed highest standards of language, morals, human values, spiritual values... all focussed from the Divine knowledge of Vedas. Such standards of austerities and human values observed by those great sages and saints cannot even be imagined in today's society for, even if some people are pure, the environment and the degraded circumstances are not so !! How history written by imaginations and such theories of modern people be believed, which they themselves are not totally believing. So only, when technologies change, the periods of civilizations change drastically as we can see with many modern historians. They contradict themselves. We need to be careful in considering the real truth, not that arrived by sheer interpolation of facts. Let us explore more into the original history of this Universe soon... →
